

When you install a TP LINK adapter, the icon instead of being adaptive, are horrible green bars that do not fit with the aesthetics of the system.

What we will do is replace those icons with the wifi icon.

Let's go to this folder:

"macOS/Library/Application Support/WLAN/StatusBarApp/Contents/Resources/"

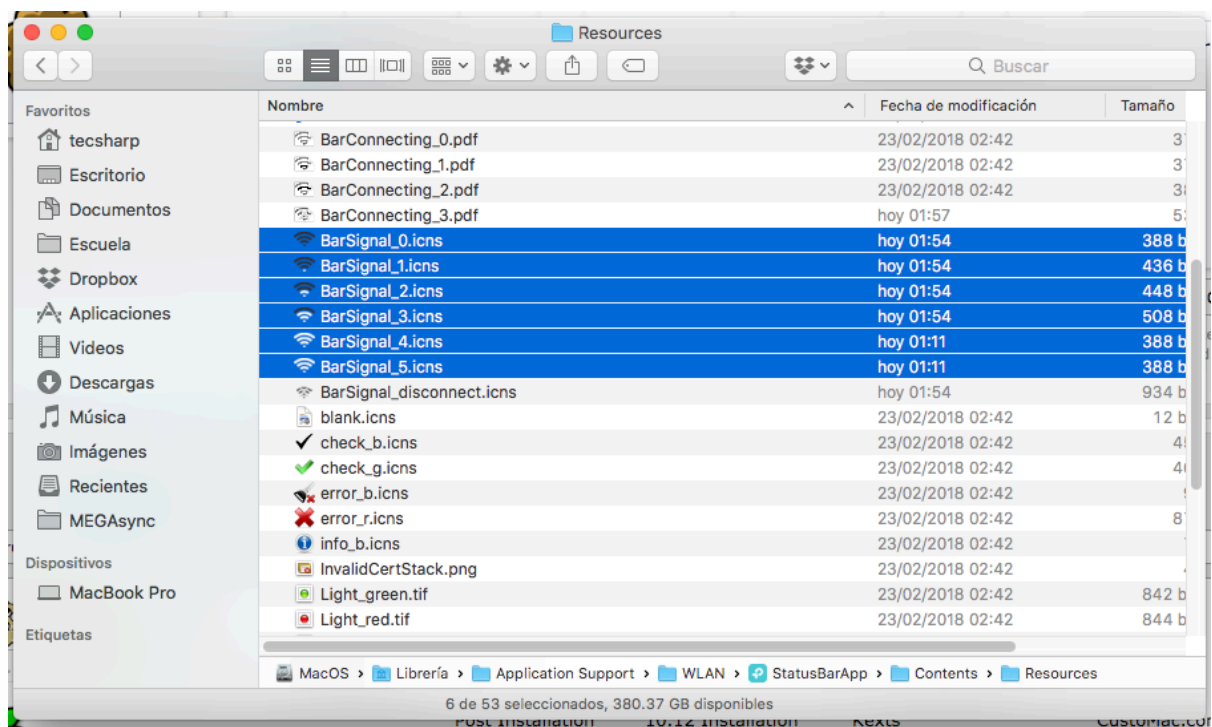

Here we can see the icons that the dongle uses.

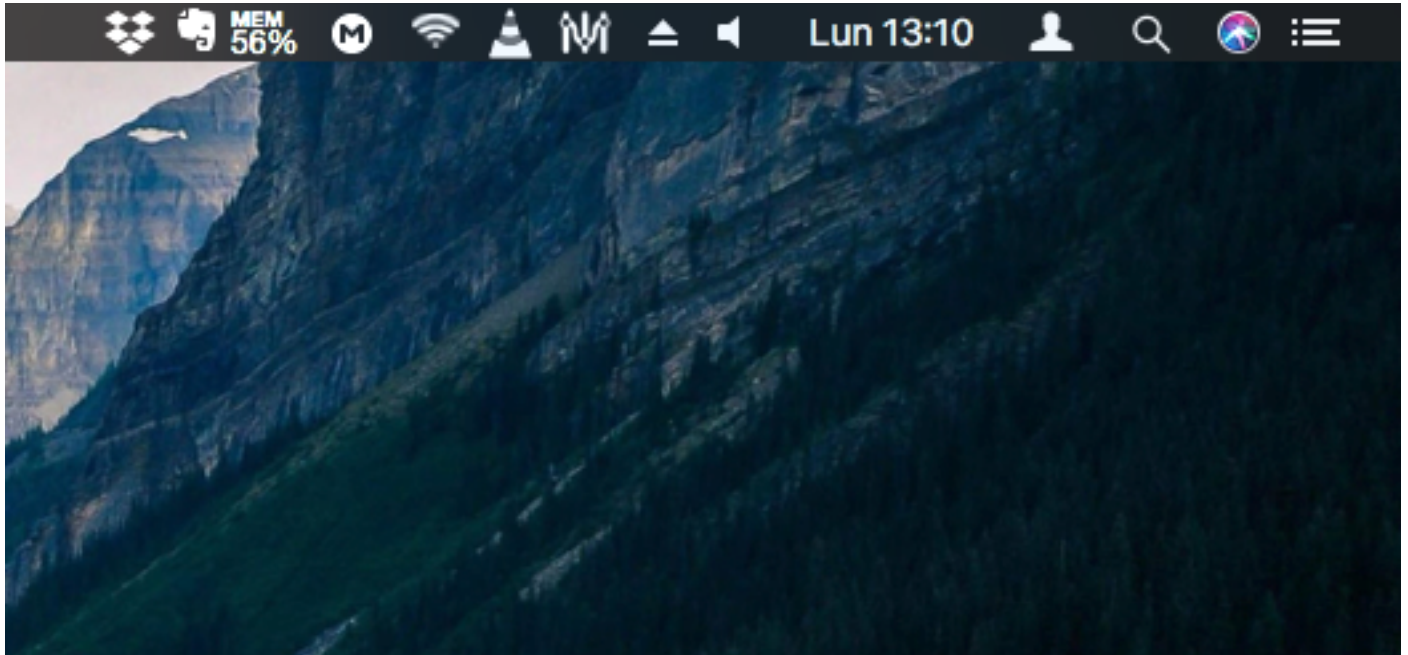

Download and replace all the icons in this file in the same folder.

https://mega.nz/#!PKBDXSoK!fHwRfo1ln07Q_PcjOf7vvZuC5N_t5wi6UIvKWR-_8

"macOS/Library/Application Support/WLAN/StatusBarApp/Contents/Resources/"

Restart and we will have the icon.

I hope it helps you. regards!
